

**(BERGSTRASSE DISTRICT
DISTRICT COMMITTEE)**

Please note

Dear parents,

When attending schools and training facilities, certain guidelines must be observed.

Requirements are set out in the state-specific rules (so-called facility protection rule and quarantine rule) and in the current general decree of the Bergstrasse district of 01. April 2021.

Children are not allowed to attend school or training facilities if they show signs of illness. Only when there are no more signs of illness the child can go there again.

Possible symptoms are: Fever, dry cough, loss of taste, loss of smell.

If other people who live with the child have symptoms of illness, the child is also not allowed to attend school or training facilities until all people who live with him or her have no symptoms of illness.

Children are also not allowed to attend school or training facilities if a person with whom the child lives has a positive coronavirus SARS-CoV-2 test result (antigen rapid test or test for self-implementation / lay test). The child is only allowed to return to the facility if the person concerned has a negative PCR test.

If someone who lives with the child was tested positive with a PCR test, everyone in the household must be immediately quarantined. This also applies if the child was tested positive using a PCR test. Quarantine means you are only allowed to leave the house or apartment for a doctor's visit or for a corona test. You are not allowed to have visitors. This applies for at least 14 days after the test or for the duration that the health department communicates to you.

If a person is in quarantine who lives with the child, the child as a contact person may only return to school or the training facility once the quarantine for this person has ended.

If you need medical help, first call your family doctor, the on-call service or emergency services and explain that you are in quarantine.

With best regards

Your Gesundheitsamt des Kreises Bergstraße
(Health department of the Bergstrasse district)
